

January 28, 2014

Schlecht Construction, Inc. is a commercial General Contractor and Russell & Sons Plumbing has become our "go to" plumbing subcontractor for the majority of our projects, large and small.

We build in a wide geographical area and Russell & Sons travels when and where we need them. They have performed the plumbing scope of work for us on manufacturing facilities, veterinary clinics and churches, as well as complicated remodels and tenant improvements. They work closely with our team on Design/Build projects and we can always count on them to offer value engineering concepts and to maintain strict quality control.

Russell & Sons Plumbing is an outstanding company that operates with integrity when it comes to customer service, pricing, scheduling, and standing by their work. We offer our highest recommendation for them.

Larry Schlecht,
President,
Schlecht Construction, Inc.
